## Air Compressors

### Four Stage Air Compressor

Heavy duty industrial four stage air compressor for high pressure applications.

Type:	Four Stage
Pressure:	High Pressure
Usage:	Industrial

### Kirloskar Type Air Compressor

Robust reciprocating air compressor designed for durability and continuous duty.

Type:	Reciprocating
Cooling:	Air Cooled
Material:	Cast Iron

### Vertical Air Compressor

Space-saving vertical design air compressor, ideal for workshops with limited floor space.

Orientation:	Vertical
Power:	25-250 HP
Efficiency:	High

### Reciprocating Compressor

Standard reciprocating compressor for medium-duty industrial applications.

Type:	Reciprocating
Stages:	Single/Two
Duty:	Continuous

# Oxygen Plant Components

## Expansion Engine

High-precision stainless steel expansion engine for oxygen plants. Critical for cryogenic cooling.

Material:	Stainless Steel
Application:	Oxygen Plant
Type:	High Pressure

## Liquid Oxygen Pump

Specialized cryogenic pump for handling liquid oxygen safely and reliably.

Fluid:	Liquid Oxygen
Type:	Cryogenic
Material:	SS 304/316

## Ball Valve

High-quality stainless steel ball valve for oxygen plant applications.

Material:	Stainless Steel
Type:	Two Piece
Application:	Oxygen Line

## Molecular Sieve

High-performance molecular sieve for gas separation in PSA plants.

Type:	13X/5A
Application:	Gas Separation
Capacity:	Industrial

## Oxygen Analyzer

Precision oxygen purity analyzer for monitoring and quality control.

Range:	0-100%
Display:	Digital
Accuracy:	±0.1%

## Perlite Powder

Insulation material for cryogenic vessels and storage tanks.

Material:	Expanded Perlite
Application:	Insulation
Temperature:	Cryogenic

## Spares & Valves

### Safety Relief Valve

Industrial brass safety valve for over-pressure protection.

Material:	Brass
Pressure:	Adjustable
Connection:	Threaded

### Aftercooler Assembly

Efficient heat exchanger to cool compressed air and remove moisture.

Type:	Fin Tube
Material:	Copper/Steel
Function:	Cooling

### Air Oil Separator

Premium quality separator element to ensure oil-free air delivery.

Efficiency:	99.9%
Life:	Long Service
Type:	Spin-on/Element

### Piston Rings

Precision-engineered piston rings for oxygen compressors.

Material:	Special Alloy
Type:	Compression
Application:	Compressor

### NRV (Non-Return Valve)

Spring-loaded non-return valve for preventing backflow.

Material:	Stainless Steel
Type:	Spring Loaded
Application:	Pipeline

### Air Filter

High-efficiency air filter for compressor intake.

Efficiency:	99.5%
Type:	Panel/Cartridge
Application:	Compressor

## Contact Us

### About Air King

With over 20 years of experience, Air King is your trusted partner for industrial air solutions. We specialize in manufacturing and supplying high-quality air compressors, oxygen plant components, and genuine spare parts to industries across India.

### Our Services

- ✓ Air Compressor Sales & Installation
- ✓ Oxygen Plant Setup & Maintenance
- ✓ Genuine Spare Parts Supply
- ✓ Annual Maintenance Contracts (AMC)
- ✓ 24/7 Breakdown Support
- ✓ Air Audit Services

### Why Choose Air King?

- ✓ 20+ Years of Industry Experience
- ✓ 500+ Successful Installations
- ✓ 100% Genuine Parts Guarantee
- ✓ Pan-India Service Network
- ✓ Competitive Pricing
- ✓ Expert Technical Support
